Application No. 10/633,657

Docket No.: 5277-0101PUS1

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A specially processed extract of *Radix Stephaniae tetrandrae* (SPRST) comprising tetrandrine (Tet), fangchinoline (Fan), cyclanoline (Cyc) oblongine (Obl) alkaloids and other compounds with biological activity; wherein said specially processed extract is prepared by extracting *Radix Stephaniae tetrandrae* with 95% ethanol at 60°C three times.

2. (Withdrawn) A assay specially processed extract of *Radix Stephaniae tetrandrae* (SPRST) methods,

Standard solution, an accurately weighed amount of the four standard alkaloids, tetrandrine, fangchinoline, cyclanoline and oblongine were dissolved in MeOH;

Calibration curves were established based on five points covering a concentration range of 12.5-250 μ g/ml for tetrandrine, 12.5-250 μ g/ml for fangchinoline, 163.7-1637.5 μ g/ml for cyclanoline, 145-1450 μ g/ml for oblongine;

Standard solution (20 μ l) were used for HPLC injections (n=5). Calibration graphs were plotted subsequent to linear regression analysis of the peak area with concentrations.

3. (Currently amended) A specially processed extract of *Radix Stephaniae tetrandrae* (SPRST) comprising tetrandrine (Tet), fangchinoline (Fan), cyclanoline (Cyc), and oblongine (Obl), other compounds with biological activity and optionally containing diluents and/or excipients, wherein the extract has anti-inflammatory activity; wherein said specially processed extract is prepared by extracting *Radix Stephaniae tetrandrae* with 95% ethanol at 60°C three times.
